 Scale 1:500

LOCATION PLAN

Reliable **VISION**

“Life without vision of the future, is like a life of a blind”.

These lines aptly describe the chaotic life we are leading. But surely life's value is much more than a few million bucks. It is not merely a process of growing physically or excelling monetarily. Life is living with liveliness and not only breathing just for the sake of keeping our mortal self alive. Two different operators in the form of mind and brain reside in our very being. A constant conflicting dual between these two is going on inside us. Naturally, majority of the times it is the intellectual intervention that succeeds and desires of mind are relegated to the background. Submerged deep within this restless mind is a need asking for happiness and fulfillment, solace and peace which when side tracked can bring frustration and desolation in life. And a time comes when we certainly can't avoid these wishes of our inner self and start looking out for modes which will lead us to the path of satisfaction and contentment and thus enriching our lives with happiness and fulfillment.

Blessed with celestial bliss

Most of us have heard the phrase “killing two birds at one stroke”. Well, **RELIABLE VISION**, quite satisfactorily execute the requirements of both – the practical brain and the peace of loving mind at one go. A total change in the conditions and the environ is what is needed to shift the focus or our mind away from the regular boring problems of daily life. **RELIABLE VISION**, as it is quite suitably named is a place affluent with abundant richness of natural beauty. With its cup brimming with all the colorful displays of divinely creations it sure is an Elysium of our fantasies. It's a heady task for wordsmiths to come up with a description parallel to the aesthetic ambience of **RELIABLE VISION**. With the chirping of birds and buzzing of insects contributing as lyrics and rustling of leaves and cracking noise of woody branches summing up the musical composition, life here truly seems like a song whose melody is dispersed by the cool wind perfumed with the intoxicating soft aroma of wild floras in the surroundings.

Profitable promises

Significant positioning and mesmerizing surroundings are the major highlights of this project. Naturally, it satisfies the profit seeking demand of the practical brain and fulfils the need of the mind for a beautiful and tranquil locale. Moreover being just 10.5 kms from airport it comes up as an ideal place for weekend holidays, picnics, or even a long stretch of vacations. Since it is backed by the company with a record of 2000 satisfied customers behind and well known for its clean and honest ways of dealings security of funds is guaranteed. Thus successfully cater to the needs of mind and brain making this investment very promising and advantageous.

Building Solid Foundation....
